

## **EPP Party Barometer**January 2023

**created by Olaf Wientzek** Konrad-Adenauer-Stiftung

27/01/2023

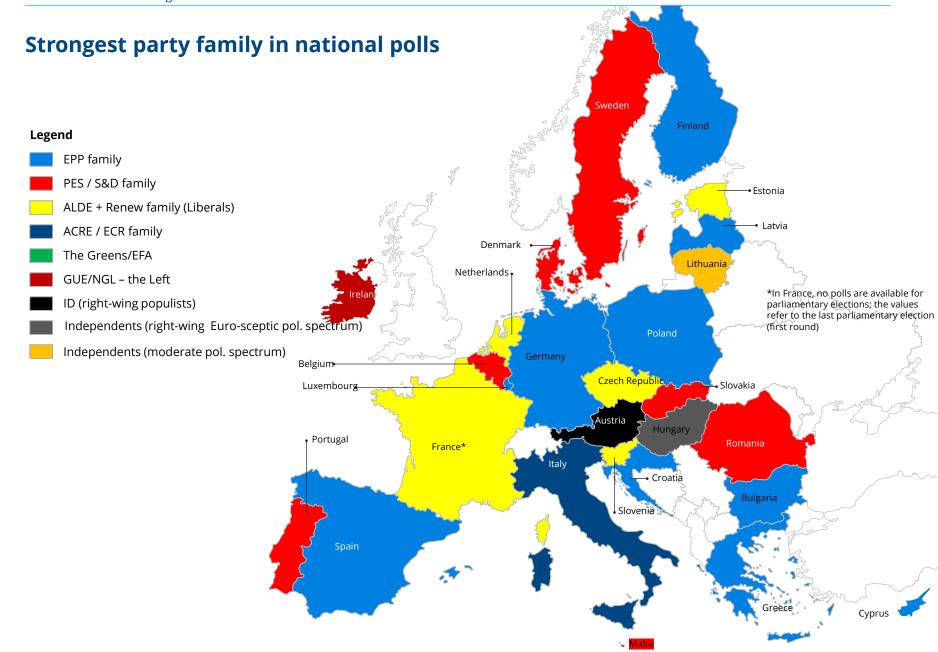

## Key developments in the reporting period (I)

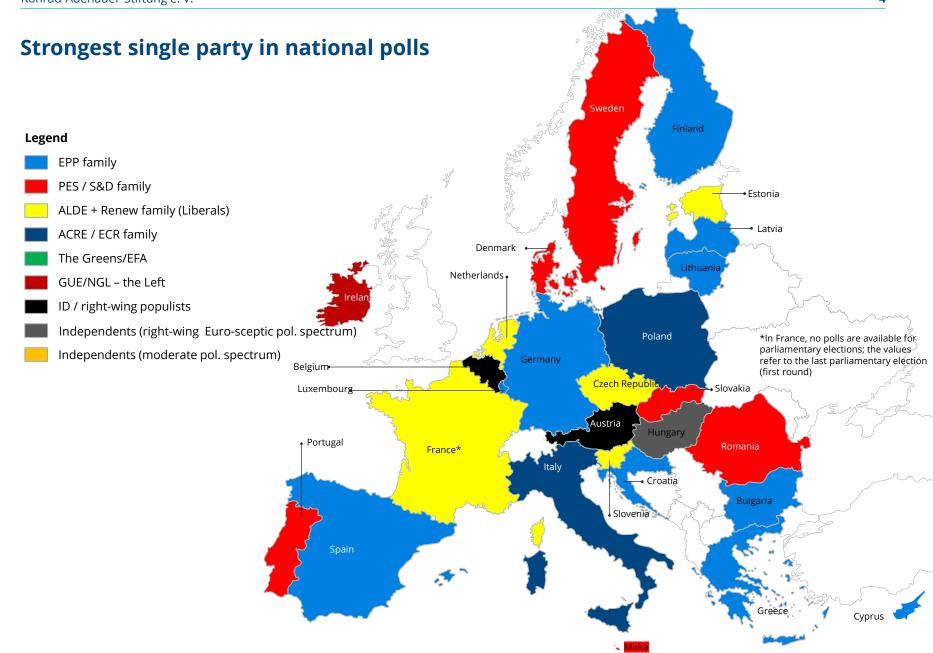

#### Situation of the EPP family in the EU as a whole

- > According to polls, the EPP family is the strongest political family in 10 countries (+2 compared to the last Barometer), the Socialists in 7 (-1). The Liberals/Renew lead the polls in five, and the Euro-sceptic national conservative ECR in two (-1) countries. The Left (GUE/NGL) is leading in Ireland, the right-wing populist ID in Austria. In Hungary, Fidesz was in the lead (not yet part of a party family) and formally independent parties or alliances comprising several party families were ahead in Lithuania.
- > The picture is similar if we look at the strongest single party and not the largest party family: then the EPP leads in ten countries, the Socialists in six. The Liberals are ahead in five, the ECR and the ID in two and the Left in one country each; in Hungary, Fidesz (not yet a new party family) is in the lead.
- > The lead over other party families or other individual parties is often very narrow (e.g. Slovenia, Poland, Lithuania, Belgium, Portugal, Bulgaria, Latvia), or other polls see another party family or individual party in the lead.

#### **Situation in the European Council**

- > Nine of the 27 heads of state and government in the European Council currently belong to the EPP family.
- > Six heads of state and government belong to the Liberals/Renew.
- > Six belong to the Social Democrats/Socialists (S&D).
- > Three belong to the Euro-sceptic Conservatives (ECR).
- > Three are formally independent.

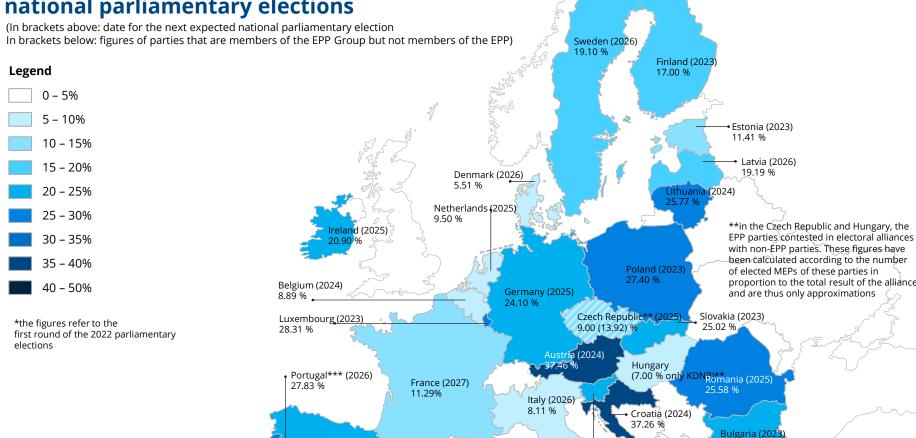

# Strength of the EPP family and the respective strongest individual EPP parties in the EU member states

Cyprus (2<mark>026</mark> 27.77 %

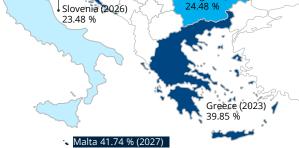

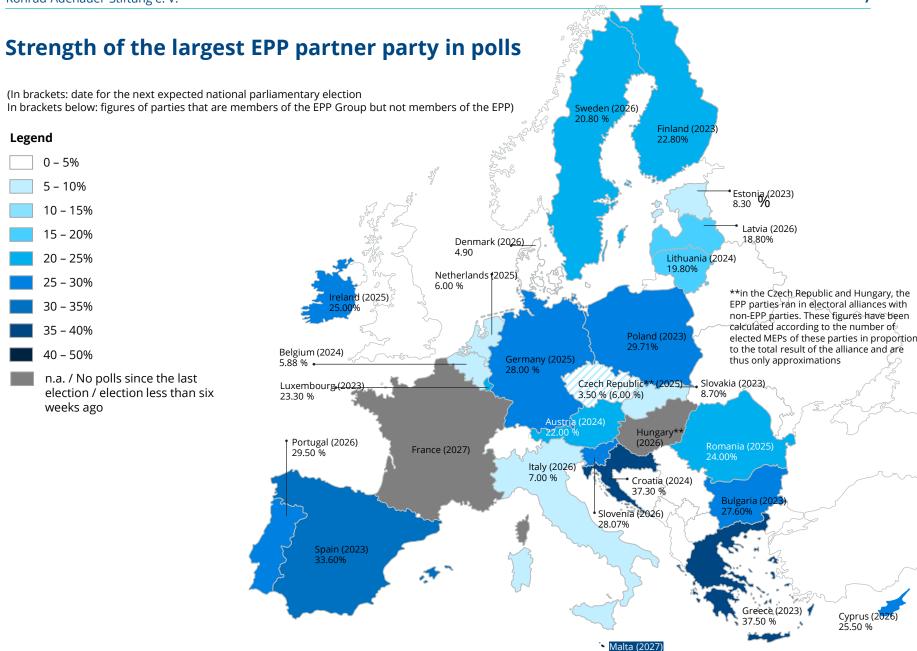

Spain (2023)

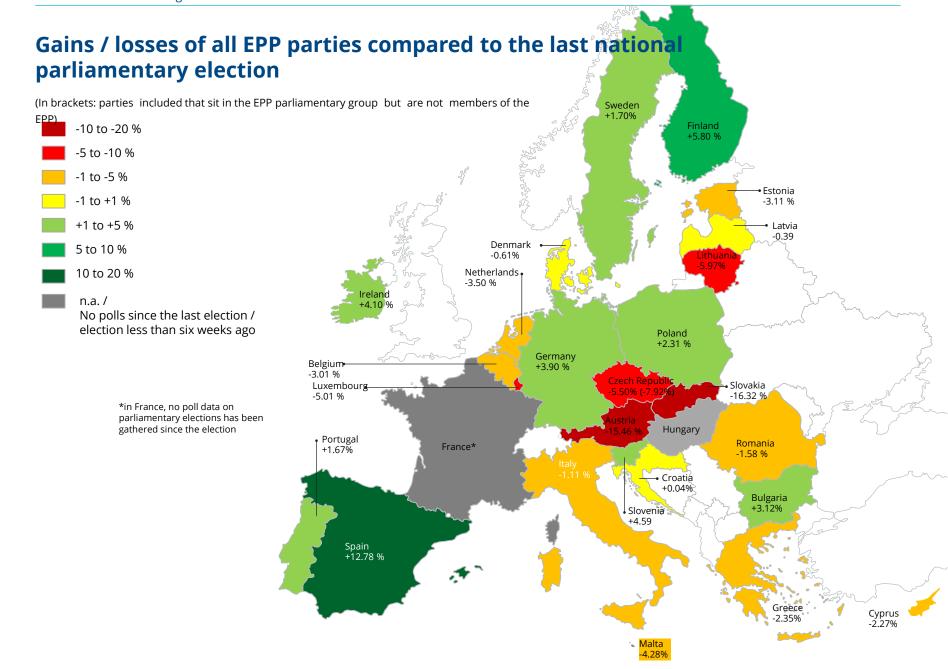

20.82 %

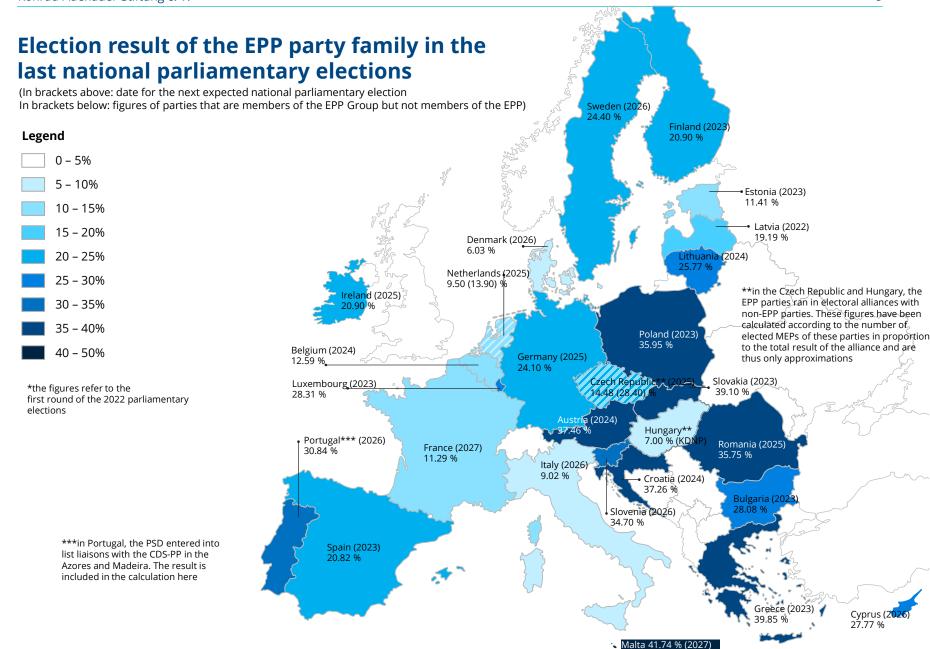

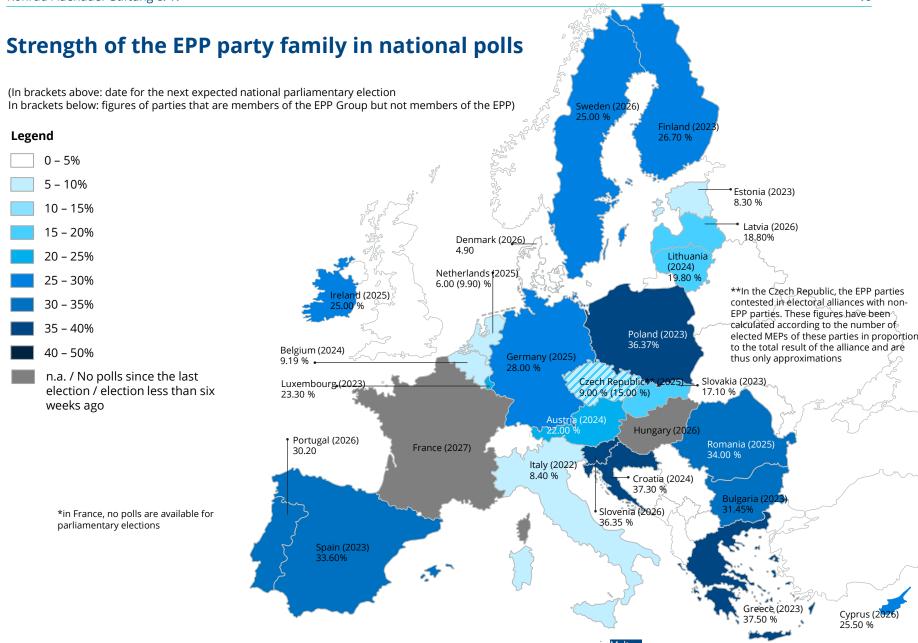

\*\*\*in Portugal, the PSD entered into list liaisons with the CDS-PP in the Azores and Madeira. Only the result of the individual list is calculated here.

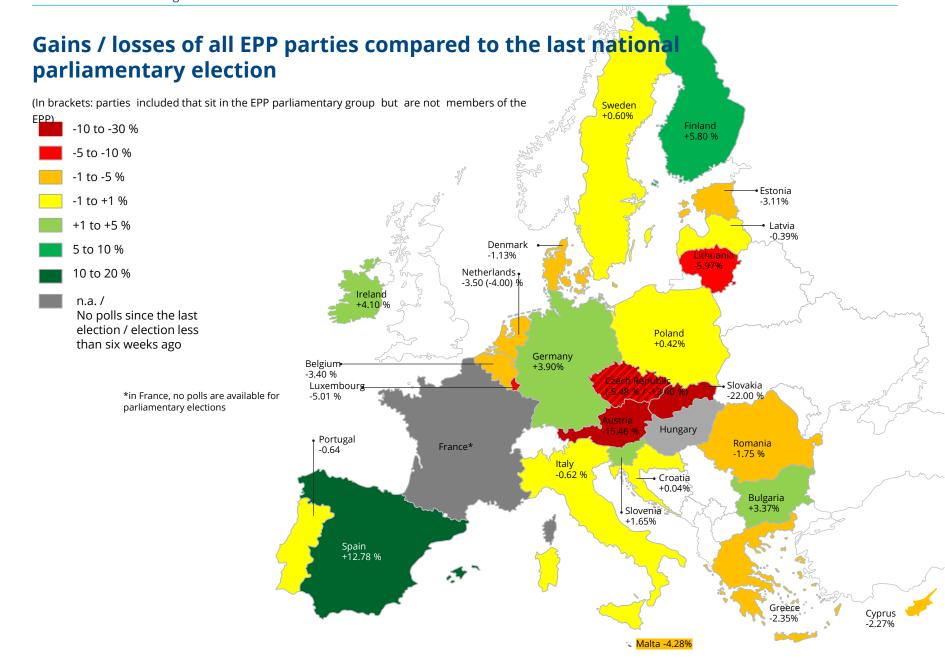

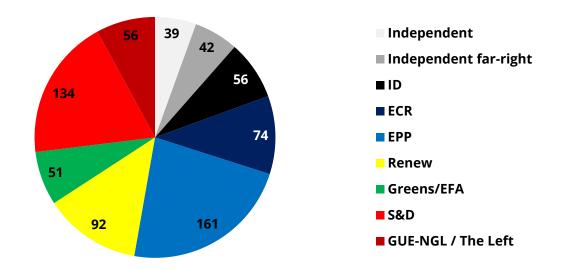

## Composition of the EP

## **Composition of the EP**

### Composition of the European Parliament with unchanged parliamentary groups

- > IMPORTANT: National polls can only be used with reservations as a picture of the mood for the EP elections. The figures presented here should therefore be treated with caution.
- > If the membership of the respective parliamentary groups in the EP were to remain constant, the following picture would emerge:
  - The EPP would lose seats compared to the 2019 EP elections but would still remain the largest force by a narrow margin. The result would be around 161 seats and, in all probability, between 150-173 seats.
  - > The Socialists/Social Democrats would only reach 134, a significant decline compared to the last two Barometers, which can in part be explained by the currently weak poll ratings in Italy.
  - > ECR is gaining mainly due to the strong FdI, although this effect is somewhat dampened by the PiS's slightly weakening ratings.
  - The hitherto independent groups (ALDE and the Greens in particular) and the hitherto independent right-wing populists (ECR and, to a lesser extent, ID) would have growth potential.

## The EPP family's participation in government

Political family of current heads of state and government i the EU

#### Legend

**EPP** family

PES / S&D family

ALDE + Renew family (Liberals)

ACRE / ECR family

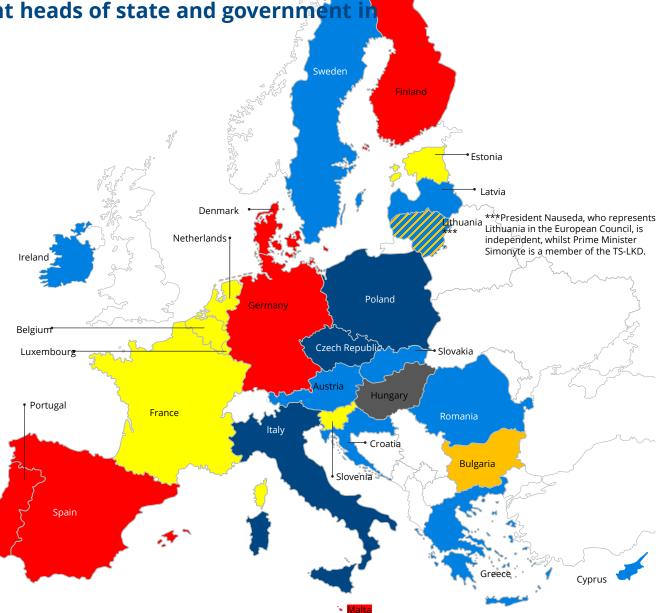

The Greens/EFA

GUE/NGL - the Left

ID / right-wing populists

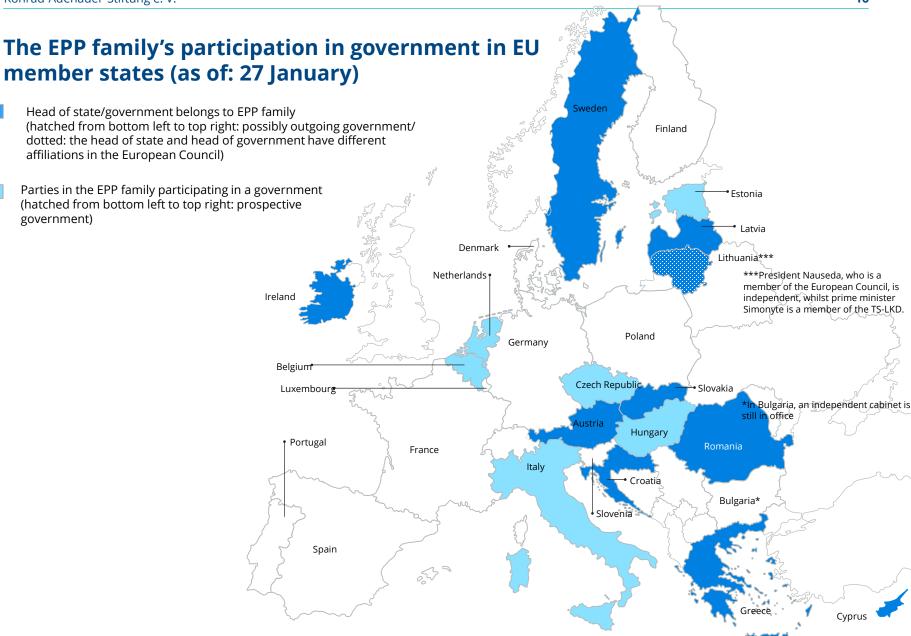

Independent (Fidesz)

Other independents

## **Notes**

- In France, no polls for national parliamentary elections have been conducted since the elections in June 2022. These results refer to the figures achieved by the respective presidential candidate as well as the polls for a corresponding candidate
- In Belgium, polls are only conducted at the regional level: in order to obtain an adequate result at the national level, these individual results were each weighted according to the number of eligible voters (voting is compulsory) and the actual turnout. There may be small deviations as a result. In Belgium, the CD&V, CSP and CDH partner parties only compete regionally. The results in the individual regions are weighted accordingly. The CSP only competes in European elections. At national elections, it is part of the CDH, as the Belgian parliament is composed according to regions (Flanders, Wallonia, Brussels) and not according to language communities.
- In several countries, undecided and non-voters are included as part of the total (100%) in polls. The polling numbers are extrapolated accordingly. Example: Party A has 13% in the polls. 30% of respondents will not vote, and 20% of respondents are undecided. Accordingly, support for Party A is reported as 26%.
- In Germany, the CDU and CSU are not listed as two separate parties because they form a single parliamentary bloc, and their polling numbers are always added together.
- In several countries, parties are part of the EPP parliamentary group without belonging to the EPP. Some of them even belong to other party families, for example, CU and 50 Plus in the Netherlands or STAN in the Czech Republic. Their respective results are given in brackets.
- Some of the parties in the ECR family are right-wing populist or have strong right-wing populist elements. As this is now a mainstream party family, the parties belonging to it are listed as part of the ECR family and not as "right-wing populist".
- In the Czech Republic, the parties that are part of the EPP group in the EP ran in an electoral alliance with non-EPP parties. The KDU-CSL and TOP 09 with the ODS (ECR) and STAN (EPP group) with the Pirates. These figures have been calculated according to the number of elected MEPs of these parties in proportion to the total result of the alliance and are thus only approximations. The same applies to two of the EPP member parties in Bulgaria.
